Interpretation of Planar Structure in Drill-Hole Core
Interpretation of Planar Structure in Drill-Hole Core

MARK S. LYONS

Project Geology Branch, California Department of Water Resources, Oroville, Calif.
This volume is made possible through the bequest of Richard Alexander Fullerton Penrose, Jr.
Acknowledgments

The writer gratefully acknowledges consultations with the late Prof. M. R. Demers, who verified some of the mathematical concepts and simplified some of the formulas. E. G. Leishman and O. L. Huber reviewed the text and offered helpful suggestions for presentation. Appreciation is extended to W. A. Flanders who assisted in construction of models which were very helpful in analyzing the problem. The writer gratefully acknowledges his wife, Iona, without whose co-operation this paper would not have been written.
